Maxthon Browser History

Maxthon is a global software company that develops state-of-the-art web browsers that continually set new standards for simplicity, speed and security. Under the leadership of Jeff Chen, the founder and CEO of Maxthon, these benefits, along with features that set new standards of industry excellence and draw praise from consumers – are part of a broader campaign to transform the power of the Internet and connect the world with a browser. Each month more than 100 million people use Maxthon's web browser in more than 140 countries around the world.

Since 2012, Maxthon has led the world in HTML5 browser support. HTML5 is fast becoming the operating system of the web. It is essential to creating a better online experience for users. At the same time is also gives developers an easier way to build and manage websites. And the independent confirmation of Maxthon's success – from the highest performance-based standards to praise from top technology journalists – is at the center of its achievements with HTML5.

Maxthon is a 'ground-up' phenomenon. The company grew because people all around the world tried its products and loved them. Technology leaders discovered Maxthon and enjoyed it, too. Soon enough, Maxthon was a global phenomenon.

Maxthon's achievements include a series of notable milestones:
